

## Nead Werx is currently accepting applications for Mobile Application Developers!

### Qualifications:

Experience building mobile applications and mobile web sites for iPhone, iPad, Android or Blackberry is required. Experience with a large-scale web site is a plus. Expertise in Objective C, Java for Android, HTML, JavaScript and CSS is required. Experience with phone camera, GPS, compass and accelerometer is preferred. Candidates must provide samples of work. Students currently working towards a college degree and recent graduates are welcome to apply.

Candidates must show an aptitude for detail. They should display leadership skills such as taking proper responsibility, pursuing solutions to problem, displaying resourcefulness towards accomplishing given task or goals. They must exhibit an ability to focus on mundane functions of their job, as well as being self-motivated to learn new skills in order to accomplish new tasks.

### Duties:

The Mobile Application Developer is focused on creating Nead Werx Mobile Applications. Mobile Application Developers must have a working knowledge of the various mobile and web technologies used to produce content, and leverage this knowledge to ensure that code is written according to industry best practices.

Mobile development tasks include coding, testing, debugging, documenting, peer-reviewing, deploying, monitoring, and support. All tasks are performed in accordance with industry best practices and specific internal procedures and standards.

The Mobile Application Developer must consistently meet or exceed deadlines on programming projects.

Qualified applicants should submit a cover letter, resume and a sample of your work to [careers@neadwerx.com](mailto:careers@neadwerx.com).
